LETTER OF RECOMMENDATION

I am writing this in favor of my student Mr. Arul Prakash Samathuvamani. I have tutored him for Microprocessors and Microcontrollers. Mr. Arul Prakash Samathuvamani is sincere and hardworking student with unparalleled self-drive to excel in his chosen field. He often approaches me with doubts and new ideas that helped me realize his passion to go beyond what is necessary.

He is one of the well rounded graduates and is a self-motivated individual which I have noticed by my acquaintance with him during the course of his study. He never hesitates to clarify his doubts and I assure you that his fundamentals are very strong. He shows great interest for projects related to his subjects. He always focused his research on solving problems in the society which I have observed through his work on developing a Non-Intrusive blood glucose monitoring system as part of his course work. He has passion towards research and has a vision for his future.

Apart from his curriculum, he is the one who is always ready to take responsibilities in different clubs with parallel balance in academic studies. He worked with me closely as Web Development and Automation Head of Electronics Engineers Association (EEA). He was responsible for designing the website of EEA and Electrofocus, a National Level Technical Symposium within a short period of time. He is dedicated and approach a potentially stressful situation with calmness and reason. He is also rational with concern over the society. I can confidently say that Arul possesses an excellent leadership quality and organisational ability. He also served as the head of Electronics team in Racing Nemos, the team which participated in Formula Bharat representing Madras Institute of Technology.

I sincerely believe that he is a standout individual with a unique way of thinking. He is one of those uncommon people who understands the logics before the technology, who gives significance to knowledge than the evaluations and willingly works time and over again to attain the precise result. He also has a strong will power and can adapt to situations while not changing himself completely. Arul has shown a penchant for grasping and visualizing practical difficulties which makes him an ideal candidate for advanced research. Bearing his impressive background and calibre in mind, I strongly recommend Mr. Arul Prakash Samathuvamani for your academic institution.

M. Manikandan
